DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyashita et al., US No. 2003/0022005 ("Miyashita") in view of Mahmud et al., US No. 2003/0040553.

- i. Miyashita discloses a gasket material comprising a metal plate (2), A film (4) and a rubber layer (5) formed on a least at least one opposite surface of the metal plate through the film.
- ii. Miyashita does not disclose the film being composed of a metal other than chromium or chromium compound.
- iii. Mahmud discloses an elastomeric composition, made of silica (para. 8) a metal such as lithium nitrite (para. 40) and a reaction of an acid component (i.e. the daizonium salt form by reaction with hydrochloric acid), in order to provide proper abrasion resistance (para. 16)
- iv. It would have been obvious to one of ordinary skill in the art to modify the film of Miyashita with the material of Mahmud in order to impart proper abrasion resistance to the gasket material.
